Re: MM-Docket 93-139

FCC - MAIL ROOM

Dear Mr. Caton:

This letter, on behalf of radio station KPXR (FM) Anchorage, Alaska, is to file comments regarding the FM Channel upgrade filed by American Radio Brokers, Inc. for radio station KXDZ (FM) Anchorage, Alaska.

We have no objections to the ARB "Comments" to keep KXDZ (FM) on Channel 276 as a C-1 facility. In fact, we support the proposal, as it will allow better spacing of FM Channels in Anchorage: KPXR (FM) at 102.1 MHZ, KXDZ (FM) at 103.1 MHZ, and KBRJ (FM) at 104.1 MHZ.

If KXDZ (FM) were to upgrade on Channel 275 as a C-1, there would be some limitations on possible transmitter sites caused by the unused Channel 276A at Seward, Alaska.

Transmitter sites are severely restricted here in Anchorage by recent height limitations imposed by local governmental agencies and the close-in location of Anchorage International Airport.

We believe it is in the public interest to Authorize KXDZ (FM) to operate as a "C-1" facility on 103.1 MHZ- FM Channel 276C1 and to assign a different, vacant FM Channel at Seward, Alaska to allow this.

Sincerely Yours,
